

Included in Kit

4" extruded **aluminum trim** is sent for front and sides. You may install standard house gut-tering over trim, if desired.

Snap together 3" insulated panels, made from .032 or .024 aluminum sheets laminated to a high density polystyrene core, provide our strongest support.

Extruded aluminum **2 piece wall hanger** allows virtually any roof pitch and protects against damage from ground heaving.

OPTIONAL COMPONENTS

Rollformed 3"x 8" Support Beam

Choose your designer end

standard end cut

deluxe end cut

scallop end cut

Extruded, 3" square Support Beam

Extruded, 3" L Support Beam

Beams allow posts to be set back up to 24" from front of cover.

Extruded aluminum posts, 3" square 8' 10' or 12' height

- Heavy walled extrusion provides load bearing strength.
- Resistant to weed eaters and dings.
- Aluminum is rust and rot free.

Panel with fan Beam

This allows you to hang a ceiling light or fan. When installing, run electrical wire through the beam and secure light or fan to beam. Beam is installed into the panel at the factory. Place this panel where desired.

**Factory Installed Fan/Light Beam
Used to Support Heavy Fans/Lights
& Act as a Conduit for Wiring**

Adjustable slope cap, extruded aluminum

When mounting cover with alot of slope, this helps keep beam perpendicular.

Can attach to either 3"x 8" beam or 3"x3" beam

Yukon

Insulated Covers

14' projection x 24' width • 8" double beam

10' projection x 18' width • 3" beam

- Yukon patio covers lower the outside temperature by up to 10 degrees with R12 rated insulation.
- Engineered for all climate requirements, the Yukon provides superior protection from winter storms.
- Built to last a lifetime with minimal care.
- Components are prepunched, making installation fast and easy.
