

Since Americana is a “custom” manufacturer, non-standard items are routinely fabricated with no delays. Minimal extra charges may be incurred for engineering.

**TWO FRAME OPTIONS:**

- 1) Tubular shelters (shown) use a straight post and have a single concealed anchor bolt.
- 2) C Channel shelters are the most economical shelter on the market and are formed into a tapered “C” with 4 exposed anchor bolts.

**ANTI-GRAFFITI, POWDER COAT FINISH**

- Anti graffiti finish, standard on all shelters, allows for easy removal of vandalism. Spray paint & markers will disappear!
- Our high quality finish virtually eliminates multiple scragging, steel brushing, priming & repainting caused by rust.

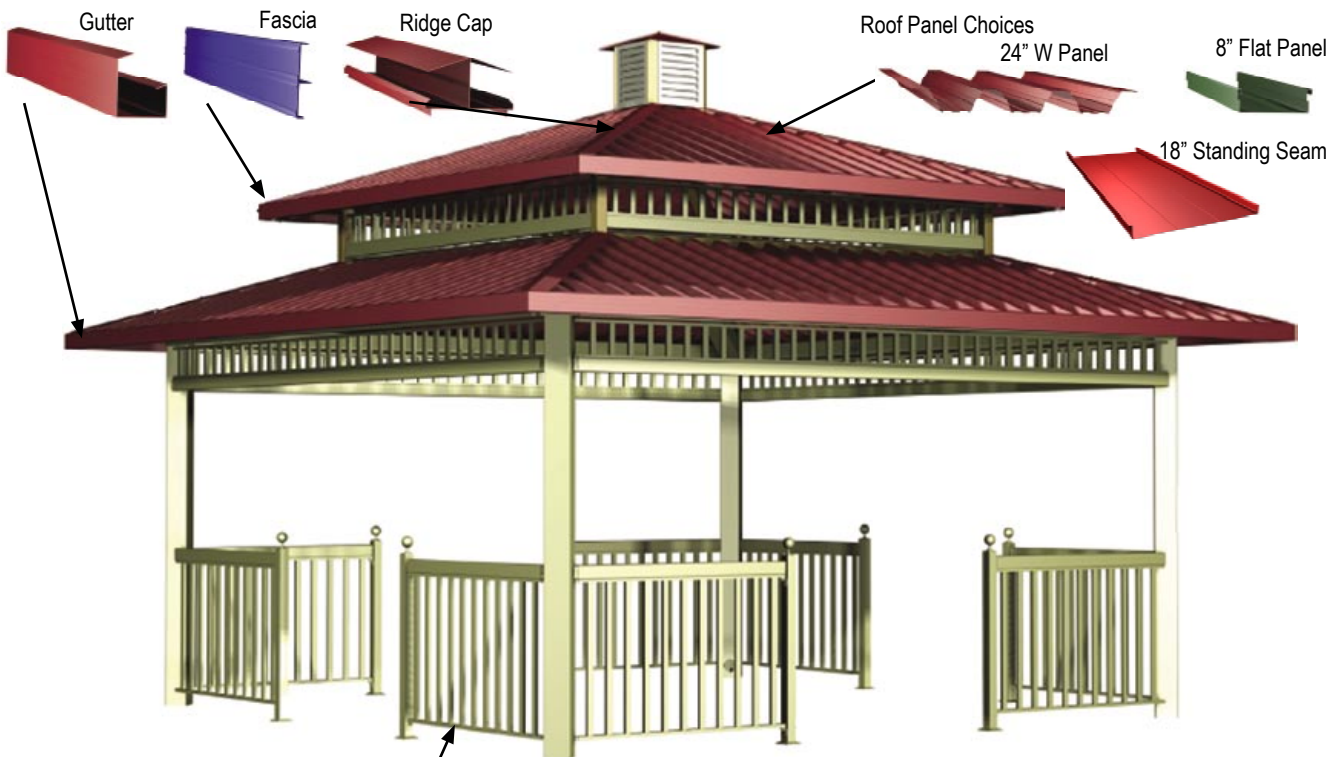

**EXTRUDED TRIM COMPONENTS**

- Extruded aluminum fascia, gutter and ridge caps ensure straight flush edges enhancing a “cleaner”, high quality look.
- Extruded gutters, stronger than roll formed trim, help control water run off and soil erosion.

**STRUCTURAL ROOF PANELS**

- Provide a cleaner look by eliminating multiple unsightly roof supports
- Snap together roof panels come in two materials:
  - 1) Galvalume® steel: combined barrier protection of aluminum and zinc. 20 year guarantee against rust
  - 2) High strength aluminum
- rust proof, lighter and easier to install

**HEAVY DUTY ALUMINUM RAILING**

- Four styles: standard, classic (shown), circle, & diamond
- Pre-assembled aluminum sections are faster to install and never rust, eliminating multiple scragging & repainting
- All railings meet OSHA, ADA, BOCA safety criteria

**SIMPLE INSTALLATION**

- Pre-drilled structure for bolt together assembly, snap together roof panels and detailed assembly instructions help minimize installation costs.
- Zinc plated, galvanized or stainless steel fasteners eliminated rust and stains.easier to install
