Heater with RTS Receiver

The Heater with RTS receiver is a 1500w infrared heater that enables consumers to spend more time enjoying their awning and outdoor living space. Equipped with Somfy's exclusive RTS technology, users can control the heater with the same remote as their awning and patio lights. This weatherproof infrared heater is environmentally friendly (low CO2 footprint) and energy efficient by providing instant heat to warm people and not the air.

Heater with RTS Receiver

PRODUCT HIGHLIGHTS

- Control your infrared heat bar with the same remote as your awning.
- Built in RTS receiver.
- Compatible with the Telis RTS range of transmitters and the NEW DecoFlex WireFree™ RTS wall switch.
- Optional mounting brackets for use under awnings.

Infrared Heaters the Green Alternative!

- Lower running costs than gas heaters: 30 cents per hour in electricity for infrared instead of \$2 per hour in gas.
- Less than 15% Co2 footprint of gas heaters.
- Not affected by wind unlike gas heaters – IR heaters warm the people and not the air!
- No time for heater to warm up – no wasted heat or electricity.
