SPECIFICATIONS **FABRIC SHELTERS**

DESCRIPTION: Manufactured from color-fast, weather-resistant fabric and durable aluminum support frames, this shelter is designed to provide UV protection without eliminating the light. Requires minimal maintenance.

FABRIC: Solertex Max® – 100% Polypropylene or Polyethylene cloth 4.8 oz – 124 lbs Tensile strength. Blocks 90% of ultra violet rays.
Gore-Tex® M 1000 thread from expanded PTFE fiber – the most advanced weather-resistant, synthetic fiber available.

STRUCTURE: Schedule 40 aluminum 6105 T5
Columns: 2 ½” pipe, .203 wall.
Rafters: 1 ½” pipe, .145 wall.
Fasteners: Stainless steel bolts and nuts attach post and rafter.
Vinyl coated ¼” galvanized cable supports fabric at perimeter.

INSTRUCTIONS: Complete detailed installation instructions and assembly drawings are supplied with each shelter.
